

# PRODIGY

Meticulously crafted and beautifully engineered, **Prodigy** redefines the Mini-ITX chassis. The compact housing is suspended by handles made with BitFenix FlyerFlex™ Composite for easy portability and maximum shock absorption. The spacious internals give you the flexibility to install up to five 3.5" hard disks or no less than nine SSDs. The modular FlexCage™ can also be removed entirely to fit long graphics cards and water cooling radiators up to 240mm in length, and a choice of Midnight Black or Arctic White with available interchangeable face plates mean Prodigy will suit your individual style. With tool-free convenience, two USB 3.0 ports, filtered intakes, and proprietary BitFenix SoftTouch™ Surface Treatment, Prodigy is the compact case with no compromises.
