

# Alchemy Multisleeved Cable Aluminum combs

**CPU 4 pin (2 x Aluminum Combs)**

**CPU 8 pin (2 x Aluminum Combs)**

**CPU 4+4 pin (2 x Aluminum Combs)**

**24 pin (2 x Aluminum Combs)**

**PCIe Power cables 8 pin(3 x Aluminum Combs)**

**PCIe Power cables 6 pin(3 x Aluminum Combs)**

**PCIe Power cables 6+2 pin(3 x Aluminum Combs)**

With the Alchemy Multisleeved Cable Aluminum combs , we are bringing the best available sleeved cable extension to the market with support for even higher performance components. The Alchemy Multisleeved Cable Aluminum combs have different cables for the motherboard, the CPU and VGA power cable, thus enabling clean and organized cable management. The sleeved extension cables feature a premium ultra-dense weave and are available in black and white with matching aluminum cables combs in black and silver respectively.

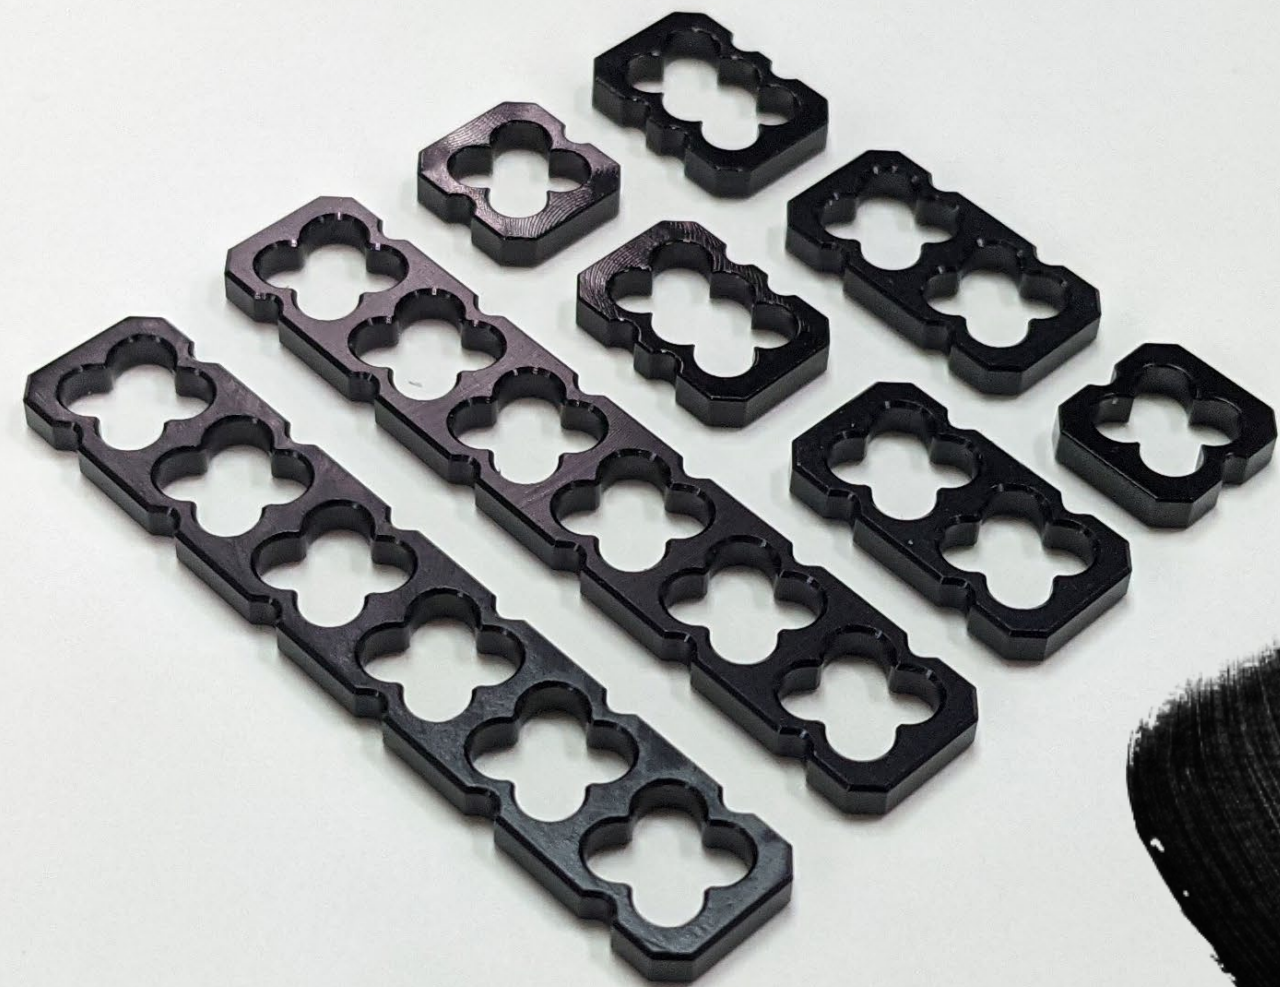

# RTX 3090 & 6900XT Ready

8PCIe / 6+2PCIe / 6PCIe Aluminum Comb Extension Cable to deliver **sufficient** power to any graphics card, even the latest NVIDIA RTX 3090 or AMD Radeon 6900XT. These are manufactured with High Current Alloy Terminals on both ends to facilitate the high power draw of the latest graphics cards without heating up or melting **keeping your components safe**

# Fine Aluminum Combs

Precision machined aluminum cable combs can neatly arrange the cables to setup a clean and sleek system. The use of high quality aluminum provides more stability to the cable compared to other materials and perfectly designed to fit the Alchemy cables. The diamond cut edges protects both your fingers and the cables from getting scratched up during installation while also making it easy to adjust the location of the cable comb.

The Alchemy Multisleeved Cable Aluminum combs are available in either black or white paired with matching black anodized aluminum cable combs and silver aluminum cable combs respectively.

## Pure copper up to 18AWG

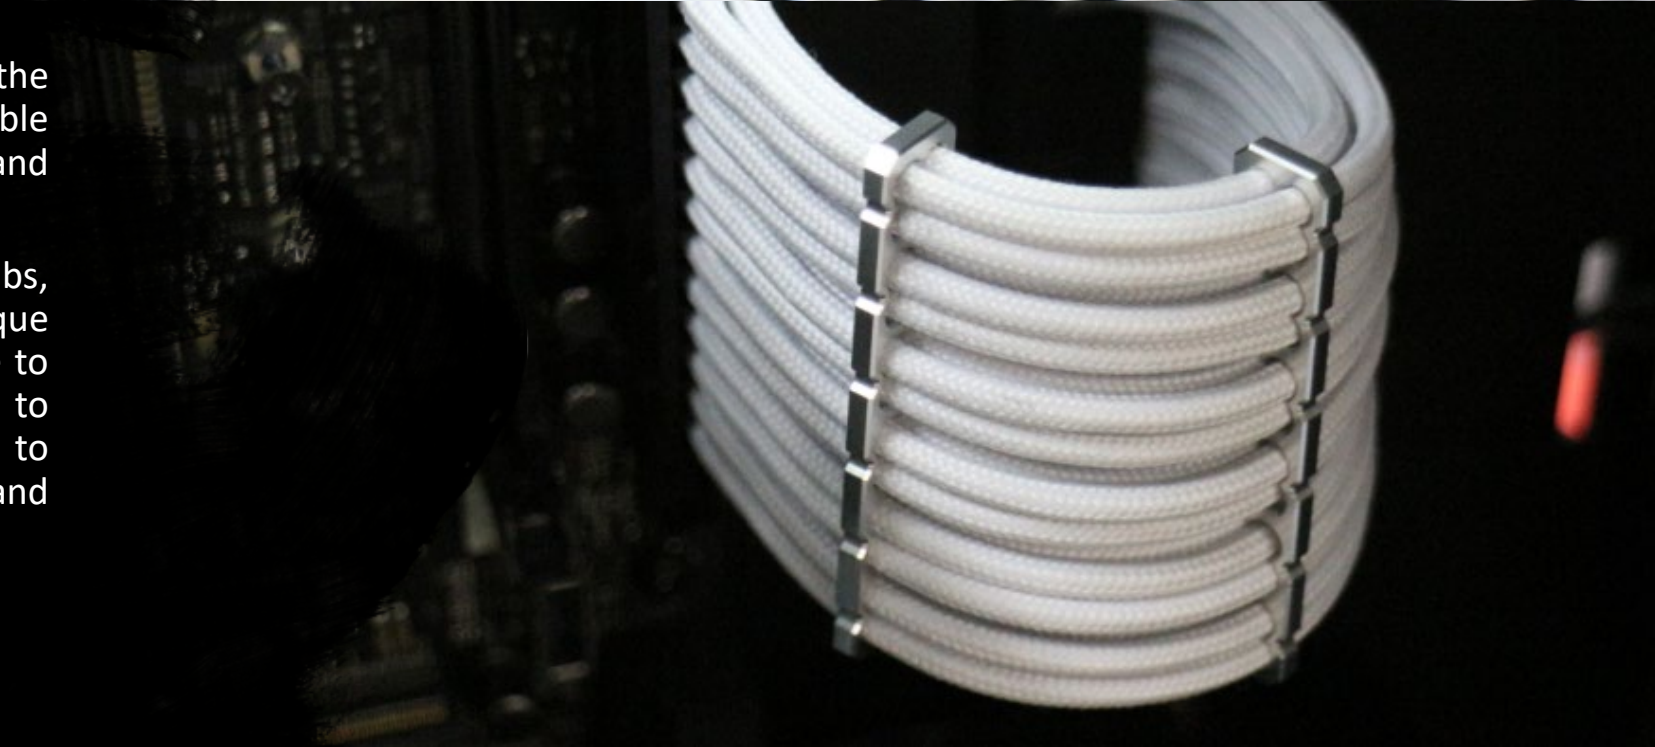

Pure copper strand cables with a thickness of up to 18AWG are used for the extension cables to reduce the resistance while increasing the efficiency. An enhanced sleeving technology allows for thicker copper strands while maintaining the smaller overall diameter for the cable.

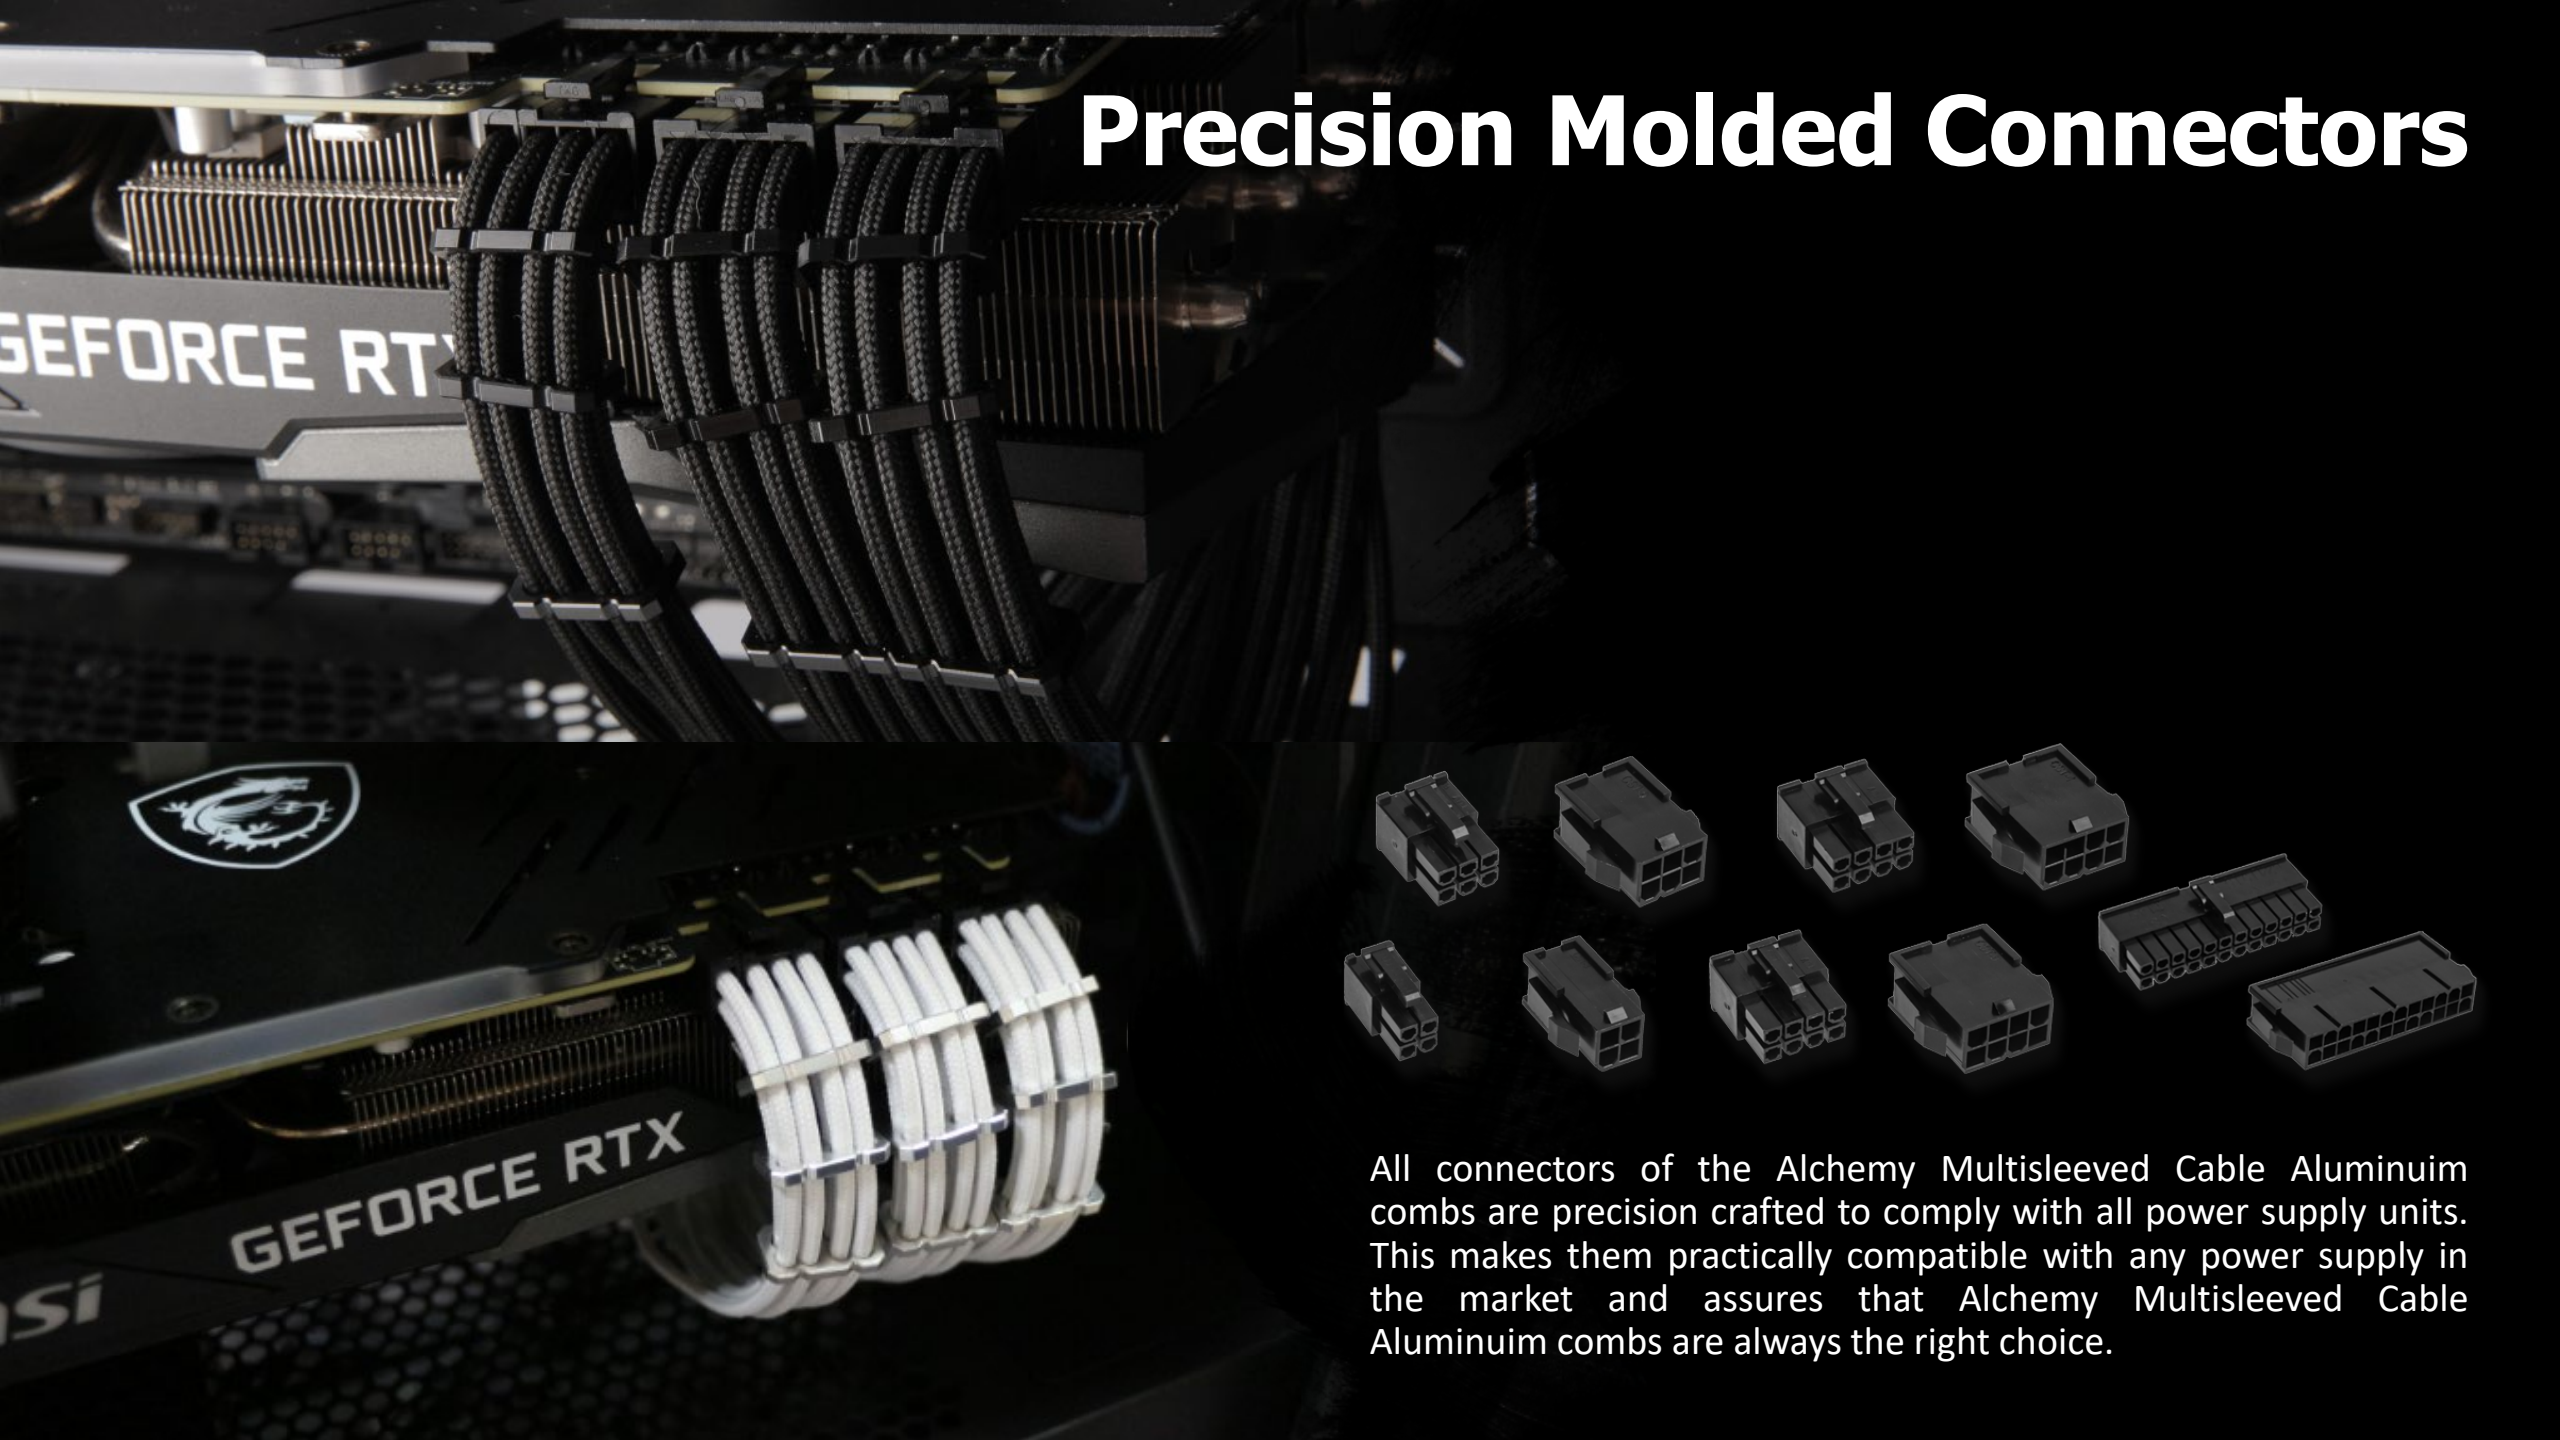

# Heatshrink-less Ultra-Dense Sleaving

A heatshrink-less sleaving process provides the premium quality of the Alchemy Multisleeved Cable Aluminum combs, assuring best quality sleaving and avoiding accidentally pulling off the sleeves.

Alchemy Multisleeved Cable Aluminum combs, features an ultra-dense sleaving through a unique weave to permanently and tightly bind the sleeve to the cable. Extremely flexible cables are used to extend the lifetime and durability of the cables to support cable management even on tight corners and areas of the case.

# Precision Molded Connectors

All connectors of the Alchemy Multisleeved Cable Aluminum combs are precision crafted to comply with all power supply units. This makes them practically compatible with any power supply in the market and assures that Alchemy Multisleeved Cable Aluminum combs are always the right choice.

# Product Highlights

## PCI-E Cable with High Current Alloy Terminals

顯卡線材選用可乘載高電流的合金端子

To provide the best connection on the terminal and minimize the efficiency drop from modular connection. Both pins and sockets use High Current Alloy Terminal

## Aluminum Cable Comb

鋁製理線梳

For optimized cable management, the this kit comes with aluminum cable comb combs. The aluminum cable combs combs will keep the look of the extension cables clean while easily and getting the best look for your system. To prevent damage to the sleeves, all corners are rounded off.

## Pure Copper Strand Cables

純銅製的電纜線

With a thickness of up to 18AWG, pure copper strand cables are used for the extension cables to reduce the resistance while increasing the efficiency. An upgraded sleeving process allows thicker cable strands while maintaining the diameter of the cables.

## Precision Molded Connectors

精確模壓的連接頭

All connectors of the Alchemy 3 x 8PCIe Aluminum Comb Extension Cable Kit are precision crafted to comply with all power supply units. This makes worrying about compatibility with power supplies obsolete and assures the Alchemy 3 x 8PCIe Aluminum Comb Extension Cable Kit is always the right choice.

### High Current Alloy Terminal

To provide the best connection on the terminal and minimize the efficiency drop from modular connection.

### 8 Pin / 6+2 Pin / 6 pin PCI-E cable up to 18AWG

Using thicker cable to maintain PSU efficiency and have the best output stability.

### Pure Copper Stranded Cable

To provide low resistance ratio on all cable.

### Precision Machined Aluminum Cable Combs

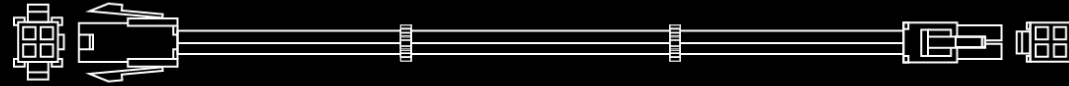

Provides convenient cable management with stunning looks and strength for a premium system configuration.

# Product Overview

4 pin ATX12V

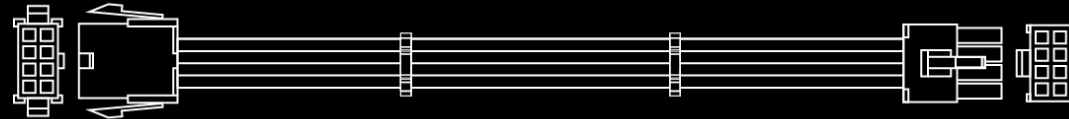

2x Aluminum Comb
