BitFenix Alchemy 2.0 Magnetic RGB LED-stripe

(10th August 2016): Together with Aurora, we are bringing you the new **Alchemy 2.0 Magnetic RGB LED-strips** certified by "*ASUS AURA*" to ease your decision of the system color. Alchemy 2.0 Magnetic RGB LED-stripes come in two lengths, 30cm and 60cm with the option to choose a set with or without the controller.

These premium Modding LED stripes are manufactured with high quality magnets to allow easy installation or relocations. They are easily attached to any steel parts including chassis and radiators (steel cover). With the modular design and included 90degree bridge, the LED loops are easy to connect and extend up to 180cm of total cable length per one controller. 70cm long cable makes sure of clean cable management and easy cable routing. These high quality cables along with the provided pass through Molex 4pin adapter provides higher current delivery allowing the Alchemy 2.0 Magnetic RGB LED-stripes to be brighter.

The controller unit for the RGB controller, *RGB Chroma Control,* is certified by "*ASUS AURA*" to be compatible with ASUS mother boards with ASUS AURA feature. This allows you to precisely choose a color from millions of options available to light up your system with. The controller when not connected to an ASUS motherboard, can be used independently to select 7 colors and breath mode. Both the RGB controller and the long extended switch to cycle through the colors are integrated with high quality magnets to allow easy installation.

All Alchemy 2.0 Magnetic RGB LED-stripes use top grade triple LED modules with **TriBright LED** technology. These LEDs have better color correction and color saturation while being brighter than ordinary RGB LEDs. Because of the narrow target wavelength produced in the LEDs, the color appears more natural and saturated to the human eye. Protected with clear rubber for short circuit protection, Alchemy 2.0 Magnetic RGB LED stripes are ideal for any type of system.

Alchemy 2.0 Magnetic RGB LED-stripe features are as follows:

ASUS ROG AURA Approved

Powerful Magnets

- Attaches to all steel chassis
- Attaches to most radiators (steel cover)
- Easily relocate the strips inside your chassis
- Re-use the strips in as many builds as you want

Modular cable system

- Pass – through Molex 4pin adapter to provide higher current delivery
- High current delivery
- Daisy chain up to 180cm in a row
- 90 degree bridge for different angles
- Long cable for easy routing (70cm)

Smart Control Box

- Elegant design
- Attaches to all steel chassis
- Long extended magnetic switch
- 7 colors and breath mode with LED off mode

TriBright LED technology

- Top grade triple LED modules
- Unmatched color saturation and brightness
- Narrow target wavelength – Excellent color appearance
- Covered with clear rubber for short circuit protection

Part Numbers

- Alchemy 2.0 RGB LED Magnetic Strip - 30c   BFA-RGB-30MK15N-RP
- Alchemy 2.0 RGB LED Magnetic Strip + Controller - 30cm   BFA-RGB-30MK15C-RP
- Alchemy 2.0 RGB LED Magnetic Strip - 60cm   BFA-RGB-60MK30N-RP
- Alchemy 2.0 RGB LED Magnetic Strip + Controller - 60cm   BFA-RGB-60MK30C-RP
